ROSTER CONTROL TOOL

Team Uniform Size Collection Template

Collect player sizes, garment quantities, names and numbers in one controlled roster.

DESIGNED FOR	WORKING OUTCOME
Clubs, schools, academies and team managers	**One approval-ready roster instead of scattered messages.**

USE THIS BEFORE THE QUOTATION

The file organises decisions. It does not confirm price, minimum quantity, availability, sample route, production timing, freight or any technical performance claim.

kitoem.com/resources/team-uniform-size-collection-template/

Five controls before you collect sizes

- Confirm the selected garment and its own size reference.
- Assign one person to maintain the master file.
- Use one row per wearer and keep top and bottom quantities separate.
- Check duplicate numbers within the same squad.
- Freeze one approved version before production release.

Size labels vary by product

A label such as M or Youth L is not a universal body measurement. Confirm the measurement table or fit sample for the approved garment before collecting the roster.

Privacy boundary

Use a player ID when a printed name is not needed. Do not collect personal contact details in the roster.
